WORK EXPERIENCE

Yetem Trading PLC

Junior IT Officer

April 2026-PRESENT

- Yetem Trading PLC is a trading company that supports day-to-day business operations through internal IT systems, user support, and technology infrastructure.
- Provide technical support for company hardware and software to keep employees productive and systems operational.
- Troubleshoot system and user-related technical issues, resolving incidents and supporting stable daily operations.
- Assist with software installation and maintenance across company devices and internal technology environments.
- Support daily IT operations and infrastructure, helping maintain reliable business technology services.

EDUCATION

American College Of Technology

Bachelors of Computer Science - 3.73 GPA

August 2025

PROJECT

Event Management System

- Built a full-stack event management platform with role-based authentication and ticket management.
- Developed responsive interfaces and REST APIs using React, Django REST Framework, and PostgreSQL.

Offline Learning Website

- Developed a responsive learning platform for accessing educational content and learning resources.
- Designed a user-friendly interface with organized course and lesson navigation.

Cosmetics E-commerce Website

- Built and deployed a responsive cosmetics e-commerce website with modern UI/UX design.
- Implemented product catalogs and direct ordering through WhatsApp and Telegram integration.

Inventory & Sales Management System

- Built a full-stack business management system for managing products, inventory, sales, customers, and purchase orders.
- Implemented real-time stock tracking, low-stock notifications, product archiving, role-based access, global search, and exportable sales, inventory, customer, and purchase order reports.
